

# Safety Data Sheet

Copyright, 2021, 3M Company All rights reserved. Copying and/or downloading of this information for the purpose of properly utilizing 3M products is allowed provided that: (1) the information is copied in full with no changes unless prior written agreement is obtained from 3M, and (2) neither the copy nor the original is resold or otherwise distributed with the intention of earning a profit thereon.

**Document group:** 27-5007-3 **Version number:** 9.06

**Revision date:** 10/05/2021 **Supersedes date:** 06/04/2021

This Safety Data Sheet has been prepared in accordance with the REACH Regulation (EC) 1907/2006 and its modifications.

# SECTION 1: Identification of the substance/mixture and of the company/undertaking

#### 1.1. Product identifier

3M Hi-Strength 90 Spray Adhesive

#### **Product Identification Numbers**

YP-2080-6129-8

7000116790

#### 1.2. Relevant identified uses of the substance or mixture and uses advised against

#### **Identified uses**

Aerosol Adhesive.

# 1.3. Details of the supplier of the safety data sheet

Address: 3M United Kingdom PLC, 3M Centre, Cain Road, Bracknell, Berkshire, RG12 8HT.

Telephone: +44 (0)1344 858 000 E Mail: tox.uk@mmm.com Website: www.3M.com/uk

#### 1.4. Emergency telephone number

+44 (0)1344 858 000

# **SECTION 2: Hazard identification**

# 2.1. Classification of the substance or mixture CLP REGULATION (EC) No 1272/2008

The health and environmental classifications of this material have been derived using the calculation method, except in cases where test data are available or the physical form impacts classification. Classification(s) based on test data or physical form are noted below, if applicable.

The aspiration hazard classification is not required because the product is an aerosol.

# **CLASSIFICATION:**

Aerosol, Category 1 - Aerosol 1; H222, H229

Serious Eye Damage/Eye Irritation, Category 2 - Eye Irrit. 2; H319

Specific Target Organ Toxicity-Single Exposure, Category 3 - STOT SE 3; H336

Hazardous to the Aquatic Environment (Chronic), Category 2 - Aquatic Chronic 2; H411

For full text of H phrases, see Section 16.

#### 2.2. Label elements

CLP REGULATION (EC) No 1272/2008

#### SIGNAL WORD

DANGER.

#### **Symbols**

GHS02 (Flame) |GHS07 (Exclamation mark) |GHS09 (Environment) |

#### **Pictograms**

# **Ingredients:**

| Ingredient | CAS Nbr  | EC No.    | % by Wt |
|------------|----------|-----------|---------|
| pentane    | 109-66-0 | 203-692-4 | 10 - 30 |
| acetone    | 67-64-1  | 200-662-2 | 7 - 13  |

#### **HAZARD STATEMENTS:**

H222 Extremely flammable aerosol.

H229 Pressurised container, may burst if heated.

H319 Causes serious eye irritation.
H336 May cause drowsiness or dizziness.

H411 Toxic to aquatic life with long lasting effects.

# PRECAUTIONARY STATEMENTS

#### **Prevention:**

P210 Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.

P211 Do not spray on an open flame or other ignition source.

P251 Do not pierce or burn, even after use.
P261E Avoid breathing vapour or spray.
P273 Avoid release to the environment.

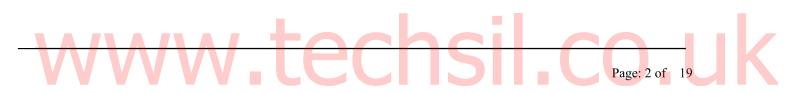

Storage:

P410 + P412 Protect from sunlight. Do not expose to temperatures exceeding 50C/122F.

#### SUPPLEMENTAL INFORMATION:

#### **Supplemental Hazard Statements:**

EUH066 Repeated exposure may cause skin dryness or cracking.

#### 2.3. Other hazards

None known.

# **SECTION 3: Composition/information on ingredients**

# 3.1. Substances

Not applicable

# 3.2. Mixtures

| Ingredient  | Identifier(s)  | %       | Classification according to Regulation (EC) No. 1272/2008 [CLP]   |
|---|--|---------|---|

Please see section 16 for the full text of any H statements referred to in this section

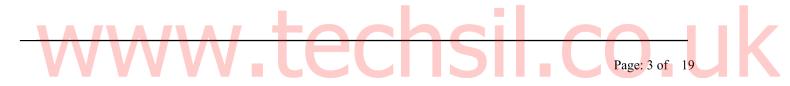

For information on ingredient occupational exposure limits or PBT or vPvB status, see sections 8 and 12 of this SDS

# **SECTION 4: First aid measures**

# 4.1. Description of first aid measures

# Inhalation

Remove person to fresh air. If you feel unwell, get medical attention.

#### Skin contact

Wash with soap and water. If signs/symptoms develop, get medical attention.

#### Eye contact

Immediately flush with large amounts of water. Remove contact lenses if easy to do. Continue rinsing. Get medical attention.

#### If swallowed

Rinse mouth. If you feel unwell, get medical attention.

#### 4.2. Most important symptoms and effects, both acute and delayed

No critical symptoms or effects. See Section 11.1, information on toxicological effects.

## 4.3. Indication of any immediate medical attention and special treatment required

Not applicable.

# **SECTION 5: Fire-fighting measures**

# 5.1. Extinguishing media

Use a fire fighting agent suitable for the surrounding fire.

# 5.2. Special hazards arising from the substance or mixture

Closed containers exposed to heat from fire may build pressure and explode.

#### **Hazardous Decomposition or By-Products**

| Substance       | <b>Condition</b>   |
|-----------------|--------------------|
| Aldehydes.      | During combustion. |
| Hydrocarbons.   | During combustion. |
| formaldehyde    | During combustion. |
| Carbon monoxide | During combustion. |
| Carbon dioxide. | During combustion. |

#### 5.3. Advice for fire-fighters

Water may not effectively extinguish fire; however, it should be used to keep fire-exposed containers and surfaces cool and prevent explosive rupture. Wear full protective clothing, including helmet, self-contained, positive pressure or pressure demand breathing apparatus, bunker coat and pants, bands around arms, waist and legs, face mask, and protective covering for exposed areas of the head.

# **SECTION 6: Accidental release measures**

# 6.1. Personal precautions, protective equipment and emergency procedures

Evacuate area. Keep away from heat/sparks/open flames/hot surfaces. - No smoking. Use only non-sparking tools. Ventilate the area with fresh air. For large spill, or spills in confined spaces, provide mechanical ventilation to disperse or exhaust vapours, in accordance with good industrial hygiene practice. Warning! A motor could be an ignition source and could cause flammable gases or vapours in the spill area to burn or explode. Refer to other sections of this SDS for information regarding physical and health hazards, respiratory protection, ventilation, and personal protective equipment.

#### 6.2. Environmental precautions

Avoid release to the environment.

#### 6.3. Methods and material for containment and cleaning up

If possible, seal leaking container. Place leaking containers in a well-ventilated area, preferably an operating exhaust hood, or if necessary outdoors on an impermeable surface until appropriate packaging for the leaking container or its contents is available. Cover spill area with a fire-extinguishing foam. Working from around the edges of the spill inward, cover with bentonite, vermiculite, or commercially available inorganic absorbent material. Mix in sufficient absorbent until it appears

dry. Remember, adding an absorbent material does not remove a physical, health, or environmental hazard. Collect as much of the spilled material as possible using non-sparking tools. Place in a metal container approved for transportation by appropriate authorities. Clean up residue with an appropriate solvent selected by a qualified and authorised person. Ventilate the area with fresh air. Read and follow safety precautions on the solvent label and Safety Data Sheet. Seal the container. Dispose of collected material as soon as possible.

#### 6.4. Reference to other sections

Refer to Section 8 and Section 13 for more information

# **SECTION 7: Handling and storage**

#### 7.1. Precautions for safe handling

For industrial/occupational use only. Not for consumer sale or use. Keep out of reach of children. Keep away from heat/sparks/open flames/hot surfaces. - No smoking. Do not spray on an open flame or other ignition source. Do not pierce or burn, even after use. Do not breathe dust/fume/gas/mist/vapours/spray. Do not get in eyes, on skin, or on clothing. Do not eat, drink or smoke when using this product. Wash thoroughly after handling. Avoid contact with oxidising agents (eg. chlorine, chromic acid etc.)

#### 7.2. Conditions for safe storage including any incompatibilities

Store in a well-ventilated place. Keep container tightly closed. Protect from sunlight. Do not expose to temperatures exceeding 50°C/122°F. Store away from heat. Store away from acids. Store away from oxidising agents.

### 7.3. Specific end use(s)

See information in Section 7.1 and 7.2 for handling and storage recommendations. See Section 8 for exposure controls and personal protection recommendations.

# **SECTION 8: Exposure controls/personal protection**

# 8.1 Control parameters

#### Occupational exposure limits

If a component is disclosed in section 3 but does not appear in the table below, an occupational exposure limit is not available for the component.

| Ingredient     | CAS Nbr  | Agency | Limit type  | <b>Additional comments</b> |
|----------------|----------|--------|---|----------------------------|
| pentane        | 109-66-0 | UK HSC | TWA:1800 mg/m <sup>3</sup> (600 ppm)                                      |                            |
| cyclohexane    | 110-82-7 | UK HSC | TWA:350 mg/m <sup>3</sup> (100 ppm);STEL:1050 mg/m <sup>3</sup> (300 ppm) |                            |
| dimethyl ether | 115-10-6 | UK HSC | TWA:766 mg/m <sup>3</sup> (400 ppm);STEL:958 mg/m <sup>3</sup> (500 ppm)  |                            |
| acetone        | 67-64-1  | UK HSC | TWA:1210 mg/m³(500 ppm);STEL:3620 mg/m³(1500 ppm)                         |                            |
| isopentane     | 78-78-4  | UK HSC | TWA:1800 mg/m <sup>3</sup> (600 ppm)                                      |                            |

UK HSC: UK Health and Safety Commission

TWA: Time-Weighted-Average STEL: Short Term Exposure Limit

CEIL: Ceiling

#### **Biological limit values**

No biological limit values exist for any of the components listed in Section 3 of this safety data sheet.

#### Derived no effect level (DNEL)

| Ingredient Degradation Population Human exposure | DNEL |
|--|------|
|--|------|

|             | Product |        | pattern  |                       |
|-------------|---------|--------|--|-----------------------|
| cyclohexane |         | Worker | Dermal, Long-term exposure (8 hours), Systemic effects     | 2,016 mg/kg bw/d      |
| cyclohexane |         | Worker | Inhalation, Long-term exposure (8 hours), Local effects    | 700 mg/m <sup>3</sup> |
| cyclohexane |         | Worker | Inhalation, Long-term exposure (8 hours), Systemic effects | 700 mg/m <sup>3</sup> |
| cyclohexane |         | Worker | Inhalation, Short-term exposure, Local effects             | 700 mg/m <sup>3</sup> |
| cyclohexane |         | Worker | Inhalation, Short-term exposure, Systemic effects          | 700 mg/m <sup>3</sup> |

Predicted no effect concentrations (PNEC)

| Ingredient  | Degradation<br>Product | Compartment                    | PNEC             |
|-------------|------------------------|--------------------------------|------------------|
| cyclohexane |                        | Freshwater                     | 0.207 mg/l       |
| cyclohexane |                        | Freshwater sediments           | 3.627 mg/kg d.w. |
| cyclohexane |                        | Intermittent releases to water | 0.207 mg/l       |
| cyclohexane |                        | Marine water                   | 0.207 mg/l       |

**Recommended monitoring procedures:** Information on recommended monitoring procedures can be obtained from UK HSC

# 8.2. Exposure controls

In addition, refer to the annex for more information.

#### **8.2.1.** Engineering controls

Do not remain in area where available oxygen may be reduced. Use general dilution ventilation and/or local exhaust ventilation to control airborne exposures to below relevant Exposure Limits and/or control dust/fume/gas/mist/vapours/spray. If ventilation is not adequate, use respiratory protection equipment.

# 8.2.2. Personal protective equipment (PPE)

# Eye/face protection

Select and use eye/face protection to prevent contact based on the results of an exposure assessment. The following eye/face protection(s) are recommended:
Indirect vented goggles.

Applicable Norms/Standards
Use eye protection conforming to EN 166

# Skin/hand protection

Select and use gloves and/or protective clothing approved to relevant local standards to prevent skin contact based on the results of an exposure assessment. Selection should be based on use factors such as exposure levels, concentration of the substance or mixture, frequency and duration, physical challenges such as temperature extremes, and other use conditions. Consult with your glove and/or protective clothing manufacturer for selection of appropriate compatible gloves/protective clothing. Note: Nitrile gloves may be worn over polymer laminate gloves to improve dexterity. Gloves made from the following material(s) are recommended:

MaterialThickness (mm)Breakthrough TimePolymer laminateNo data availableNo data availableFluoroelastomer0.4=>8 hoursNitrile rubber.0.35=>8 hours

The glove data presented are based on the substance driving dermal toxicity and the conditions present at the time of testing. Breakthrough time may be altered when the glove is subjected to use conditions that place additional stress on the glove.

Applicable Norms/Standards
Use gloves tested to EN 374

#### Respiratory protection

An exposure assessment may be needed to decide if a respirator is required. If a respirator is needed, use respirators as part of a full respiratory protection program. Based on the results of the exposure assessment, select from the following respirator type(s) to reduce inhalation exposure:

Half facepiece or full facepiece air-purifying respirator suitable for organic vapours and particulates

Half facepiece or full facepiece supplied-air respirator

Organic vapour respirators may have short service life.

For questions about suitability for a specific application, consult with your respirator manufacturer.

Applicable Norms/Standards

Use a respirator conforming to EN 140 or EN 136

Use a respirator conforming to EN 140 or EN 136: filter types A & P

#### 8.2.3. Environmental exposure controls

Refer to Annex

# **SECTION 9: Physical and chemical properties**

9.1. Information on basic physical and chemical properties

Physical stateLiquid.Specific Physical Form:AerosolColourColourlessOdorSolvent

Odour thresholdNo data available.Melting point/freezing pointNot applicable.Boiling point/boiling rangeNot applicable.Flammability (solid, gas)Not applicable.Flammable Limits(LEL)No data available.Flammable Limits(UEL)No data available.

Flash point >= -55 °C [Test Method:Closed Cup]

Autoignition temperatureNo data available.Decomposition temperatureNo data available.

oH substance/mixture is non-soluble (in water)

**Kinematic Viscosity** *Not applicable.* 

Water solubility Nil

Solubility- non-water

Partition coefficient: n-octanol/water

No data available.

Vapour pressure

No data available.

**Density** 0.71 g/ml

**Relative density** [Ref Std: WATER=1]Not applicable.

**Relative Vapor Density** *No data available.* 

#### 9.2. Other information

9.2.2 Other safety characteristics

**EU Volatile Organic Compounds** 

**Evaporation rate Percent volatile**No data available.

89.6 % weight

# **SECTION 10: Stability and reactivity**

#### 10.1 Reactivity

This material may be reactive with certain agents under certain conditions - see the remaining headings in this section

89.5 %

#### 10.2 Chemical stability

Stable.

#### 10.3 Possibility of hazardous reactions

Hazardous polymerisation will not occur.

#### 10.4 Conditions to avoid

Heat.

Sparks and/or flames.

#### 10.5 Incompatible materials

Strong oxidising agents.

#### 10.6 Hazardous decomposition products

Substance

**Condition** 

None known.

Refer to section 5.2 for hazardous decomposition products during combustion.

# **SECTION 11: Toxicological information**

The information below may not agree with the EU material classification in Section 2 and/or the ingredient classifications in Section 3 if specific ingredient classifications are mandated by a competent authority. In addition, statements and data presented in Section 11 are based on UN GHS calculation rules and classifications derived from internal hazard assessments.

#### 11.1. Information on hazard classes as defined in Regulation (EC) No 1272/2008

Signs and Symptoms of Exposure

Based on test data and/or information on the components, this material may produce the following health effects:

#### Inhalation

Simple asphyxiation: Signs/symptoms may include increased heart rate, rapid respirations, drowsiness, headache, incoordination, altered judgement, nausea, vomiting, lethargy, seizures, coma, and may be fatal. Respiratory tract irritation: Signs/symptoms may include cough, sneezing, nasal discharge, headache, hoarseness, and nose and throat pain. May cause additional health effects (see below).

#### Skin contact

Prolonged or repeated exposure may cause: Dermal Defatting: Signs/symptoms may include localized redness, itching, drying and cracking of skin.

#### Eye contact

Severe eye irritation: Signs/symptoms may include significant redness, swelling, pain, tearing, cloudy appearance of the cornea, and impaired vision.

#### Ingestion

Gastrointestinal irritation: Signs/symptoms may include abdominal pain, stomach upset, nausea, vomiting and diarrhoea.

# **Additional Health Effects:**

# Single exposure may cause target organ effects:

Central nervous system (CNS) depression: Signs/symptoms may include headache, dizziness, drowsiness, incoordination, nausea, slowed reaction time, slurred speech, giddiness, and unconsciousness.

# **Toxicological Data**

If a component is disclosed in section 3 but does not appear in a table below, either no data are available for that endpoint or the data are not sufficient for classification.

**Acute Toxicity** 

| Name  | Route                              | Species | Value  |

|            |         |                |
| pentane    | Guinea  | Not classified |
|            | pig     |                |
| isopentane | Guinea  | Not classified |
|            | pig     |                |

# **Respiratory Sensitisation**

For the component/components, either no data is currently available or the data is not sufficient for classification.

**Germ Cell Mutagenicity** 

| Name           | Route    | Value  |
|----------------|----------|--|
|                |          |  |
| dimethyl ether | In Vitro | Not mutagenic  |
| dimethyl ether | In vivo  | Not mutagenic  |
| pentane        | In vivo  | Not mutagenic  |
| pentane        | In Vitro | Some positive data exist, but the data are not sufficient for classification |
| acetone        | In vivo  | Not mutagenic  |
| acetone        | In Vitro | Some positive data exist, but the data are not sufficient for classification |
| isopentane     | In vivo  | Not mutagenic  |
| isopentane     | In Vitro | Some positive data exist, but the data are not sufficient for classification |
| cyclohexane    | In Vitro | Not mutagenic  |
| cyclohexane    | In vivo  | Some positive data exist, but the data are not sufficient for classification |

Carcinogenicity

| Name           | Route          | Species            | Value            |
|----------------|----------------|--------------------|------------------|
| dimethyl ether | Inhalation     | Rat                | Not carcinogenic |
| acetone        | Not specified. | Multiple<br>animal | Not carcinogenic |

**Aspiration Hazard** 

| Name        | Value             |
|-------------|-------------------|
| pentane     | Aspiration hazard |
| isopentane  | Aspiration hazard |
| cyclohexane | Aspiration hazard |

Please contact the address or phone number listed on the first page of the SDS for additional toxicological information on this material and/or its components.

# 11.2. Information on other hazards

This material does not contain any substances that are assessed to be an endocrine disruptor for human health.

# **SECTION 12: Ecological information**

The information below may not agree with the EU material classification in Section 2 and/or the ingredient classifications in Section 3 if specific ingredient classifications are mandated by a competent authority. In addition, statements and data presented in Section 12 are based on UN GHS calculation rules and classifications derived from 3M assessments.

# 12.1. Toxicity

No product test data available.

| Material       | CAS#     | Organism      | Туре         | Exposure | Test endpoint | Test result |

# 12.5. Results of the PBT and vPvB assessment

This material does not contain any substances that are assessed to be a PBT or vPvB

# 12.6. Endocrine disrupting properties

This material does not contain any substances that are assessed to be an endocrine disruptor for environmental effects

#### 12.7. Other adverse effects

No information available.

# **SECTION 13: Disposal considerations**

#### 13.1 Waste treatment methods

Dispose of contents/ container in accordance with the local/regional/national/international regulations.

Incinerate in a permitted waste incineration facility. Facility must be capable of handling aerosol cans. As a disposal alternative, utilize an acceptable permitted waste disposal facility. Empty drums/barrels/containers used for transporting and

handling hazardous chemicals (chemical substances/mixtures/preparations classified as Hazardous as per applicable regulations) shall be considered, stored, treated & disposed of as hazardous wastes unless otherwise defined by applicable waste regulations. Consult with the respective regulating authorities to determine the available treatment and disposal facilities.

The coding of a waste stream is based on the application of the product by the consumer. Since this is out of the control of 3M, no waste code(s) for products after use will be provided. Please refer to the European Waste Code (EWC - 2000/532/EC and amendments) to assign the correct waste code to your waste stream. Ensure national and/or regional regulations are complied with and always use a licensed waste contractor.

# EU waste code (product as sold)

08 04 09\* Waste adhesives and sealants containing organic solvents or other dangerous substances
16 05 04\* Gases in pressure containers (including halons) containing dangerous substances

#### EU waste code (product container after use)

15 01 04 Metallic packaging

Please contact the address or phone number listed on the first page of the SDS for additional information on the transport/shipment of the material by rail (RID) or inland waterways (ADN).

# **SECTION 15: Regulatory information**

#### 15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

Carcinogenicity

IngredientCAS NbrClassificationRegulationNon-volatilesTrade SecretGr. 3: Not classifiableInternational Agency<br/>for Research on Cancer

# Restrictions on the manufacture, placing on the market and use:

The following substance(s) contained in this product is/are subject through Annex XVII of REACH regulation to restrictions on the manufacture, placing on the market and use when present in certain dangerous substances, mixtures and articles. Users of this product are required to comply with the restrictions placed upon it by the aforementioned provision.

Ingredient CAS Nbr cyclohexane 110-82-7

Restriction status: listed in REACH Annex XVII

Restricted uses: See Annex XVII to Regulation (EC) No 1907/2006 for Conditions of Restriction

#### Global inventory status

Contact 3M for more information.

#### 15.2. Chemical Safety Assessment

A chemical safety assessment has not been carried out for this mixture. Chemical safety assessments for the contained substances may have been carried out by the registrants of the substances in accordance with Regulation (EC) No 1907/2006, as amended.

# **SECTION 16: Other information**

#### List of relevant H statements

EUH066 Repeated exposure may cause skin dryness or cracking.

H222 Extremely flammable aerosol.

H224 Extremely flammable liquid and vapour.

Page: 17 of 19

# 3M Hi-Strength 90 Spray Adhesive

| H225 | Highly flammable liquid and vapour.                     |
|------|---|
| H229 | Pressurised container. may burst if heated.             |
| H280 | Contains gas under pressure; may explode if heated.     |
| H304 | May be fatal if swallowed and enters airways.           |
| H315 | Causes skin irritation.                                 |
| H319 | Causes serious eye irritation.                          |
| H336 | May cause drowsiness or dizziness.                      |
| H400 | Very toxic to aquatic life.                             |
| H410 | Very toxic to aquatic life with long lasting effects.   |
| H411 | Toxic to aquatic life with long lasting effects.        |
| H413 | May cause long lasting harmful effects to aquatic life. |

# **Revision information:**

Section 1: Product name information was modified.

Section 15: Regulations - Inventories information was added.

# **Annex**

| 1. Title                                |   |
|---|---|
| Substance identification                | cyclohexane;<br>EC No. 203-806-2;<br>CAS Nbr 110-82-7;  |
| Exposure Scenario Name                  | Industrial Use of Adhesives and Sealants  |
| Lifecycle Stage                         | Use at industrial sites   |
| Contributing activities                 | PROC 07 -Industrial spraying ERC 04 -Use of non-reactive processing aid at industrial site (no inclusion into or onto article)  |
| Processes, tasks and activities covered | Application of product.   |
| 2. Operational conditions and risk mana | <u>9</u>  |
| Operating Conditions                    | Physical state:Liquid. General operating conditions: Assumes use at not more than 20°C above ambient temperature; Duration of exposure per day at workplace [for one worker]: 8 hours/day; Emission days per year: 100 days per year; Indoor use; Outdoor use;  |
| Risk management measures                | Under the operational conditions described above the following risk management measures apply:  General risk management measures:  Human health:  Provide a good standard of general ventilation (not less than 3 to 5 air changes per hour);  Provide extract ventilation to points where emissions occur;  Environmental:  None needed; |
| Waste management measures               | Avoid release to the environment. Refer to special instructions / safety data sheet.; Do not apply industrial sludge to natural soils; Do not release to waterways or sewers; Prevent discharge of undissolved substance to or recover from wastewater;   |
| 3. Prediction of exposure               |   |
| Prediction of exposure                  | Human and environmental exposures are not expected to exceed the DNELs and PNECs when the identified risk management measures are adopted.  |
